Naunyn-Schmiedeberg's Archives of Pharmacology

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the (publisher, society); and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US$ 0.20 per page, or a minimum of US$ 1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0028-1298, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents of volume 341

No. 1–2 published on February 16, 1990

K. Racké, H. Schwörer, H. Kilbinger: Effects of the benzodiazepine receptor agonist midazolam and antagonist flumazenil on 5-hydroxytryptamine release from guinea-pig intestine in vitro. Indirect support for a "natural" benzodiazepine-like substance in the intestine **1**

A. Hirose, R. Tsuji, H. Shimizu, T. Tatsuno, H. Tanaka, Y. Kumasaka, M. Nakamura: Inhibition of 8-hydroxy-2-(di-n-propylamino) tetralin and SM-3997, a novel anxiolytic drug, of the hippocampal rhythmical slow activity mediated by 5-hydroxytryptamine$_{1A}$ receptors **8**

N. M. Deighton, S. Motomura, D. Borquez, H.-R. Zerkowski, N. Doetsch, O.-E. Brodde: Muscarinic cholinoceptors in the human heart: demonstration, subclassification, and distribution **14**

I. T. Bognar, M. T. Wesner, H. Fuder: Muscarine receptor types mediating autoinhibition of acetylcholine release and sphincter contraction in the guinea-pig iris **22**

N. Toda, S. Inoue, H. Okunishi, T. Okamura: Intra- and extraluminally-applied acetylcholine on the vascular tone or the response to transmural stimulation in dog isolated mesenteric arteries **30**

P. Soares-da-Silva: The effects of quinpirole and fenoldopam on the potassium-evoked overflow of endogenous dopamine and noradrenaline in dog mesenteric arteries **37**

M. Niebler, U. Trendelenburg: Mechanisms of the release of ^{3}H-noradrenaline by dimethylphenylpiperazinium (DMPP) in the rat vas deferens **43**

G. Richardt, U. Lumpp, M. Haass, A. Schömig: Propranolol inhibits nonexocytotic noradrenaline release in myocardial ischemia **50**

J. Ševčík, O. Kadlec, I. Šeferna: The effect of substance P on nerve action potential propagation and cholinergic transmission in the myenteric plexus of the guinea-pig ileum **56**

J. Harro, M. Põld, E. Vasar: Anxiogenic-like action of caerulein, a CCK-8 receptor agonist in the mouse: influence of acute and subchronic diazepam treatment **62**

Y. Chiba, N. Mikoda, H. Kawasaki, K. Ito: Endothelium-dependent relaxant action of platelet activating factor in the rat mesenteric artery **68**

C. A. Maggi, R. Patacchini, F. Perretti, S. Meini, S. Manzini, P. Santicioli, E. Del Bianco, A. Meli: The effect of thiorphan and epithelium removal on contractions and tachykinin release produced by activation of capsaicin-sensitive afferents in the guinea-pig isolated bronchus **74**

X.-N. Huang, T. Hisayama, I. Takayanagi: Endothelin-1 induced contraction of rat aorta: contributions made by Ca^{2+} influx and activation of contractile apparatus associated with no change in cytoplasmic Ca^{2+} level **80**

P. A. Baumann, P. Wicki, C. Stierlin, P. C. Waldmeier: Investigations on GABA$_B$ receptor-mediated autoinhibition of GABA release **88**

P. L. Smith, D. C. Chiossone, G. P. McCafferty: Characterization of LTC_4 effects on rabbit ileal mucosa in vitro **94**

A. Menargues, R. Obach, J. A. García-Sevilla: Modulation by antidepressant drugs of CNS postsynaptic α_2-adrenoceptors mediating mydriasis in the rat **101**

R. Amann, J. Donnerer, F. Lembeck: Activation of primary afferent neurons by thermal stimulation. Influence of Ruthenium Red **108**

G. G. S. Collins, W. J. Richards: Pharmacological evidence that protein kinase C modulates monosynaptic excitations in the olfactory cortex **114**

T. Ohnishi, K. Saito, S. Maeda, K. Matsumoto, M. Sakuda, R. Inoki: Intracerebroventricular treatment of mice with pertussis toxin induces hyperalgesia and enhances ^{3}H-nitrendipine binding to synaptic membranes: Similarity with morphine tolerance **123**

Y. W. Kwon, Q. Zhong, X. Y. Wei, W. Zheng, D. J. Triggle: The interactions of 1,4-dihydropyridines bearing a 2-(2-aminoethylthio)methyl substituent at voltage-dependent Ca^{2+} channels of smooth muscle, cardiac muscle and neuronal tissues **128**

F. Th. M. van Amsterdam, M. S. van Amsterdam-Magnoni, M. Haas, N. C. Punt, J. Zaagsma: Protection by verapamil and nifedipine against ischaemia-induced loss of [^{3}H]-(+)-PN 200-110 binding sites in the rat heart **137**

A. Mülsch, R. Busse: N^G-nitro-L-arginine (N^5-[imino(nitroamino)methyl]-L-ornithine) impairs endothelium-dependent dilations by inhibiting cytosolic nitric oxide synthesis from L-arginine **143**

Announcement/Meeting Announcements **148**

No. 3 published on March 22, 1990

S. Hjorth, T. Sharp, Y. Liu: *Cis*-(+)-8-OH-1-CH$_3$-DPAT, (+)ALK-3, a novel stereoselective pharmacological probe for characterizing 5-HT release-controlling 5-HT$_{1A}$ autoreceptors. An in vivo brain microdialysis study **149**

H. Bönisch, R. Boer, M. Dobler, C. Schudt: Pharmacological characterization of muscarine receptors of PC12 (rat phaeochromocytoma) cells **158**

W. Kromer, E. Baron, M. Beinborn, R. Boer, M. Eltze: Characterization of the muscarine receptor type on paracrine cells activated by McN-A-343 in the mouse isolated stomach **165**

K. Fuxe, A. M. Janson, A. Jansson, K. Andersson, P. Eneroth, L. F. Agnati: Chronic nicotine treatment increases dopamine levels and reduces dopamine utilization in substantia nigra and in surviving forebrain dopamine nerve terminal systems after a partial di-mesencephalic hemitransection **171**

K. Racké, B. Hering, K. Ziegler: Lack of autoreceptor mediated regulation of the spontaneous dopamine turnover in the isolated neurointermediate lobe of the rat pituitary gland in vitro **182**

I. den Daas, P. G. Tepper, A. S. Horn†: Improvement of the oral bioavailability of the selective dopamine agonist N-0437 in rats: the in vitro and in vivo activity of eight ester prodrugs **186**

O. S. Medvedev, M. D. Esler, J. A. Angus, H. S. Cox, G. Eisenhofer: Simultaneous determination of plasma noradrenaline and adrenaline kinetics. Responses to nitroprusside-induced hypotension and 2-deoxyglucose-induced glucopenia in the rabbit **192**

F. Hofmann, E. Habermann: Role of ω-conotoxin-sensitive calcium channels in inositolphosphate production and noradrenaline release due to potassium depolarization or stimulation with carbachol **200**

H. Kushida, T. Hiramoto, M. Endoh: The preferential inhibition of α_1- over β-adrenoceptor-mediated positive inotropic effect by organic calcium antagonists in the rabbit papillary muscle **206**

J. Reid, G. Duker, O. Almgren, V. Nerme: (+)-Sotalol causes significant occupation of β-adrenoceptors at concentrations that prolong cardiac repolarization **215**

T. Kubo, M. Kihara, Y. Misu: Electrical stimulation-evoked release of endogenous aspartate from rat medulla oblongata slices. Effects of inhibitors of aspartate aminotransferase and GABA transaminase **221**

J. T. Regenold, P. Illes: Inhibitory adenosine A_1-receptors on rat locus coeruleus neurones. An intracellular electrophysiological study **225**

U. Ravens, H.-P. Schöpper: Opposite cardiac actions of the enantiomers of Bay K 8644 at different membrane potentials in guinea-pig papillary muscles **232**

M. Nishimoto, H. Hashimoto, T. Ozaki, S. Nagashima, M. Nakashima: Effects of antidepressants on the intraventricular conduction and the incidence of arrhythmias induced by programmed ventricular stimulation in the dog heart after myocardial infarction **240**

A. M. Lefer, N. Aoki, D. Mulloy: Coronary endothelium-protective effects of defibrotide in ischaemia and reperfusion **246**

T. Mori, T. Yanagisawa, N. Taira: Phorbol 12,13-dibutyrate increases vascular tone but has a dual action on intracellular calcium levels in porcine coronary arteries **251**

C. A. Maggi, R. Patacchini, P. Santicioli, S. Giuliani, D. Turini, G. Barbanti, A. Giachetti, A. Meli: Human isolated ileum: motor responses of the circular muscle to electrical field stimulation and exogenous neuropeptides **256**

H. Ozaki, H. Kasai, M. Hori, K. Sato, H. Ishihara, H. Karaki: Direct inhibition of chicken gizzard smooth muscle contractile apparatus by caffeine **262**

Short communication

M. L. A. Crawford, C. R. Hiley, J. M. Young: Characteristics of endothelin-1 and endothelin-3 stimulation of phosphoinositide breakdown differ between regions of guinea-pig and rat brain **268**

No. 4 published on April 12, 1990

H. Yamamoto, H. Kanaide, M. Nakamura: Heparin specifically inhibits the inositol 1,4,5-trisphosphate-induced Ca^{2+} release from skinned rat aortic smooth muscle cells in primary culture **273**

I. T. Bognar, B. Beinhauer, P. Kann, H. Fuder: Different muscarinic receptors mediate autoinhibition of acetylcholine release and vagally-induced vasoconstriction in the rat isolated perfused heart **279**

I. Wessler, D. J. Dooley, J. Werhand, F. Schlemmer: Differential effects of calcium channel antagonists (ω-conotoxin GVIA, nifedipine, verapamil) on the electrically-evoked release of [^{3}H]acetylcholine from the myenteric plexus, phrenic nerve and neocortex of rats **288**

M. C. Werneck de Avellar, Y. L. Kobashi, R. Pekelmann Markus: Age-related changes in neuronal uptake of noradrenaline **295**

P. Geppetti, R. Patacchini, R. Cecconi, M. Tramontana, S. Meini, A. Romani, M. Nardi, C. A. Maggi: Effects of capsaicin, tachykinins, calcitonin gene-related peptide and bradykinin in the pig iris sphincter muscle **301**

G. Hecker, P. Ney, K. Schrör: Cytotoxic enzyme release and oxygen centered radical formation in human neutrophils are selectively inhibited by E-type prostaglandins but not by PGI_2 **308**

H. O. Onaran, T. A. Bökesoy: Kinetics of antagonism at histamine-H_1 receptors in isolated rabbit arteries **316**

Y. Kurachi, Y. Asano, H. Ito, T. Sugimoto: Voltage-dependent inhibition of the delayed outward potassium current by OPC-8490, a novel positive inotropic agent, in isolated atrial myocytes of guinea-pig heart **324**

Th. Doerr, W. Trautwein: On the mechanism of the "specific bradycardic action" of the verapamil derivative UL-FS 49 **331**

F. Markwardt Jr, T. Franke, E. Glusa, B. Nilius: Pharmacological modification of mechanical and electrical responses of frog heart to thrombin **341**

H. Tanaka, M. Nishimura, N. Homma, Y. Habuchi, Y. Watanabe: Electrophysiologic actions of aprindine in rabbit atrioventricular node **347**

M. S. Chintala, B. S. Jandhyala: Renal failure in haemorrhagic shock in dogs: Salutary effects of the calcium entry blocker felodipine **357**

T. M. Cocks, J. A. Angus: Comparison of relaxation responses of vascular and non-vascular smooth muscle to endothelium-derived relaxing factor (EDRF), acidified sodium nitrite (NO) and sodium nitroprusside **364**

Z. Xiong, T. Sakai, Y. Inoue, K. Kitamura, H. Kuriyama: Inhibitory actions of diltiazem and its derivative, TA3090 on the Ba-current recorded from smooth muscle cells of the rabbit mesenteric artery **373**

Short communications

F. Chaouloff, V. Baudrie, D. Laude: Evidence that 5-HT_{1A} receptors are involved in the adrenaline-releasing effects of 8-OH-DPAT in the conscious rat **381**

M. C. Michel, G. Hanft, G. Gross: α_{1B}- but not α_{1A}-adrenoceptors mediate inositol phosphate generation **385**

M. H. Sabouni, M. V. Ramagopal, S. J. Mustafa: Relaxation by adenosine and its analogs of potassium-contracted human coronary arteries **388**

J. G. Grohs, G. Fischer, G. Raberger: Cardiovascular effects of flesinoxan in anaesthetized and conscious dogs **472**

W. Löscher, D. Hönack: High doses of memantine (1-amino-3,5-dimethyladamantane) induce seizures in kindled but not in non-kindled rats **476**

No. 5 published on May 10, 1990

G. J. Molderings, M. Göthert: Mutual interaction between presynaptic α_2-adrenoceptors and 5-HT_{1B} receptors on the sympathetic nerve terminals of the rat inferior vena cava **391**

C. Moret, M. Briley: Modulation by drugs of the release of total tritium and ^{3}H-5-HT from rat hypothalamic slices **398**

E. Schömig, C.-L. Schönfeld: Extraneuronal noradrenaline transport uptake$_2$ in a human cell line (Caki-1 cells) **404**

M. M. Caramona, P. Soares-da-Silva: Evidence for an extraneuronal location of monoamine oxidase in renal tissues **411**

S. Kitayama, K. Morita, T. Dohi, A. Tsujimoto: Enhancement by GABA of the stimulation-evoked catecholamine release from cultured bovine adrenal chromaffin cells **414**

S. Kitayama, K. Morita, T. Dohi, A. Tsujimoto: GABAergic modulation of catecholamine release from cultured bovine adrenal chromaffin cells. Evidence for the involvement of Cl^--dependent Ca^{2+} entry **419**

S. I. Sharif, S. D. Gokhale, S. I. Chandranath: Pharmacological characterization of the postjunctional alpha-adrenoceptors of the rat isolated seminal vesicle **425**

M. Entzeroth, H. N. Doods, N. Mayer: Characterization of porcine muscarinic receptors **432**

R. L. Featherstone, C. Robinson, S. T. Holgate, M. K. Church: Evidence for thromboxane receptor mediated contraction of guinea-pig and human airways in vitro by prostaglandin (PG) D_2, 9α,11β-PGF_2 and $PGF_{2\alpha}$ **439**

L. E. Gustafsson, M. G. Persson, A. Öhlén, P. Hedqvist, L. Lindbom: Adenosine modulation of resting vascular tone in rabbit skeletal muscle **444**

W. Kromer: Reflex peristalsis in the guinea pig isolated ileum is endogenously controlled by kappa opioid receptors **450**

R. Burde, A. Buschauer, R. Seifert: Characterization of histamine H_2-receptors in human neutrophils with a series of guanidine analogues of impromidine. Are cell type-specific H_2-receptors involved in the regulation of NADPH oxidase? **455**

B. Reichardt, G. Konzen, O. Hauswirth: Pirmenol, a new antiarrhythmic drug with potassium- and sodium-channel blocking activity; a voltage-clamp study in rabbit Purkinje fibres **462**

No. 6 published on June 11, 1990

W. Löscher, U. Witte, G. Fredow, M. Ganter, K. Bickhardt: Pharmacodynamic effects of serotonin (5-HT) receptor ligands in pigs: stimulation of 5-HT_2 receptors induces malignant hyperthermia **483**

P. Elliott, D. I. Wallis: Analysis of the actions of 5-hydroxytryptamine on the rabbit isolated vagus nerve **494**

P. Elliott, B. M. Seemungal, D. I. Wallis: Antagonism of the effects of 5-hydroxytryptamine on the rabbit isolated vagus nerve by BRL 43694 and metoclopramide **503**

I. Wessler, J. Werhand: Evaluation by reverse phase HPLC of [^{3}H]acetylcholine release evoked from the myenteric plexus of the rat **510**

M. Nishimura, R.-M. Huan, Y. Habuchi, N. Homma, Y. Watanabe: Anticholinergic action of quinidine sulfate in the rabbit atrioventricular node **517**

M. L. Herepath, K. J. Broadley: Affinities of full agonists for cardiac β-adrenoceptors calculated by use of in vitro desensitization **525**

R. Amann, C. A. Maggi, S. Giuliani, J. Donnerer, F. Lembeck: Effects of carbonyl cyanide p-trichloro-methoxyphenylhydrazone (CCCP) and of ruthenium red (RR) on capsaicin-evoked neuropeptide release from peripheral terminals of primary afferent neurones **534**

I. von Kügelgen, K. Starke: Evidence for two separate vasoconstriction-mediating nucleotide receptors, both distinct from the P_{2x}-receptor, in rabbit basilar artery: a receptor for pyrimidine nucleotides and a receptor for purine nucleotides **538**

B. Costall, M. E. Kelly, E. S. Onaivi, R. J. Naylor: The effect of ketotifen in rodent models of anxiety and on the behavioural consequences of withdrawing from treatment with drugs of abuse **547**

J. Pill, E.-C. Witte, F. H. Schmidt: Reduction of BM 15.766-induced 7-dehydrocholesterol accumulation by bezafibrate and mevinolin in rats. A non-isotopic in vivo test system for compounds reducing cholesterol synthesis **552**

M. Fukuchi, T. Uematsu, S. Nagashima, M. Nakashima: Antiarrhythmic effects of a benzothiazine derivative (SD-3211) and its stereoisomer (SA3212) in anaesthetized rats and isolated perfused rat hearts compared with bepridil **557**

G. Konzen, B. Reichardt, O. Hauswirth: Fast and slow blockade of sodium channels by flecainide in rabbit cardiac Purkinje fibres **565**

M. Ungerer, M. Böhm, R. H. G. Schwinger, E. Erdmann: Antagonism of novel inotropic agents at A_1 adenosine receptors and m-cholinoceptors in human myocardium **577**

P. A. Calle, M. G. Bogaert, L. de Ridder, W. A. Buylaert: Nimodipine has no beneficial effect on neurological outcome in a cardiopulmonary arrest model in the rat **586**
